The X-Series is an upgraded **Rim Clamp®** tire changer refitted with upgrades to increase your productivity, convenience, and uptime. All upgrades are now standard across the entire X-Series line. Choose from 50X or 70X (with Robo Arm).

Coats®

ProGuard™

The **Coats® ProGuard™** tire changer is specifically engineered for oversized, run flat, and low profile applications. In addition to leverless operation, the ProGuard Leverless tire changer has built-in features that take the strain out of tire changing: lifting, prepping, bead loosening, mounting and demounting.

Coats®

APX Series

The **APX90** can handle nearly any application, with the ability to service wheels from 9" to 30" externally and without the need for additional adapters. At the same time it provides an ergonomic user experience with intuitive and easy to operate features, so that you can focus on changing tires without complicated training issues.

Balancers

The **Coats® 1250-3D** is the best 3D LED balancer in the business and is a great front line balancer. With a single touch, all three wheel parameters are loaded. Just drop the hood and go. Plus, it has a Stop and Lock, which brings the wheel to the 1st weight position and holds it until the weight is installed then auto indexes the wheel to the 2nd position and holds again...all with a push of a button.

AMMCO®

4000E

Ammco® 4000E Brake Lathe lets you adjust speed and feed combinations for today's finest finish. The 4000E increases productivity because it's built to handle light truck and SUV applications up to 200 lbs. The user-friendly digital interface delivers flawless finishes. You can digitally control the feed rates so it's easy to find the sweet spot for the highest quality finish. And the 3- position lever changes spindle speed easily so you can shift on the fly.
